

EUCO BOND S 1 WOOD ADHESIVE

Description **EUCO BOND** is an emulsion adhesive based on P.V.A. and other additives to increase strength and elasticity. A strong adhesive for wood, furniture and wooden floorings.

Advantages

- 1-Ready to use, no additives or filler materials are required.
- 2-Strong adhesion, resists all weathering conditions, water and diluted chemicals.
- 3-Can be used as a patching mortar after mixing with cement to repair the concrete floors before fixing wooden floorings.
- 4-Economical and leaves no colour on wood after drying out .
- 5-**EUCO BOND** sticks and dries in suitable time.

Application **1- For wood and furniture**

- Surface must be thoroughly clean and free from.
- Dust, water, oil etc.
- Apply **EUCO BOND** on the surface and press the two parts together without heating.

2- For wooden floorings

- Surface must be clean as mentioned above.
- Apply a medium coat of the adhesive on the surface by brush .
- Directly fix the wooden flooring and leave it until complete drying.
- Clean the tools with aromatic solvent.
